System Requirement

- Compatible with USB-C or Thunderbolt 3 based PC/laptop
- Windows
- Mac OS X

Package Content

- 1 x USB3.1 Gen. 2 to NVMe External SSD Enclosure
- 1 x USB-C to USB-A cable (50cm)
- 1 x USB-A to USB-C adapter
- 1 x Screwdriver
- 1 x Thermally conductive silicone pad
- 1 x Quick Start Guide

Product Introduction

This is a slim, aluminum and portable NVMe enclosure. Compliant with USB 3.1 Gen. 2 specification, it supports transfer speed up to 10 Gbps. Compatible with 2230/2242/2260/2280mm NVMe SSD, it offers users a wide range of SSD choices.

How to install it

1. Remove the screw of this enclosure.

2. Slowly push the bare board out.

3. Take out the bare board and put the cover aside.

4. Insert your SSD into the slot of bare board.

5. Slide back the board into the enclosure cover and tighten the screw.

Remark:
Please insert the board back in this order, otherwise you cannot put it back.

Choose the right SSD

To make the enclosure operate smoothly and successfully, you need to select the correct type of SSD first, Thunderdrive is compatible with NVMe PCIe SSD, to have a close look at the edges of different SSD, please refer to the pictures as follows:

NVMe SSD on Windows and Mac System Installation

New SSD creates partition and format installation on Windows and Mac OS

For Windows Installation

1. Right click your PC icon and select "Manage" to proceed.

2. Choose "Storage" then go to "Disk Management", right click your SSD and choose "New Simple Volume" and select "Next" to proceed.

3. Follow the instructions step by step to complete format installation.

For Mac OS Installation

1. From the drop-down list of "Go" in the toolbar, please select "Utilities".

2. Choose "Disk Utility".

3. Add the SSD Drive name or use the default name.

4. A window will pop out, and select "Erase".

5. Select the right partition that formats your SSD.

6. Press "Done" to complete the installation.
