* The above resolutions are factory test results; The resolution may be different depending on the actual situation of the computer and monitor.
Note:
If you want to use the 3 displays with your PC/laptop simultaneously, please make sure that the Graphics card of the USB-C port supports **at least 4 displays** of DP ALT Mode, including your PC's own screen. Check with your PC manufacturer on this. If your Graphics card doesn't support 4 displays, please check Q&A: Q8 for details.

Remarks for Windows based PC/laptops:
1. Before you connect two or three monitors, we suggest you lower monitor resolution, please check Q&A: Q9 for details.
2. Before you connect three monitors, we suggest you disconnect PC/laptop first, please check Q&A: Q8 for details.
Remarks for Mac based PC/laptops:
- Mac OS is Single-Stream Transport mode, so only one video source can be output such as ABB or ABBB(A is the primary display).

Q & A

Q1. What is DP1.2, DP1.4?
A1. DP (DisplayPort) is a video interface standard. It has two versions: DP 1.2 and DP 1.4. Only the USB-C port featuring DisplayPort Alt Mode, which is an alternate mode for video, can output video properly.

Q2. How do I figue out the DP version of my laptop?
A2. 1. Check your laptop brand, model and Graphics model.
2. Consult the laptop official customer service.

Q3. What is DisplayPort Alt Mode (DisplayPort Alternate mode)?
A3. DisplayPort Alt Mode is an extended function of the USB-C interface, and it outputs video through the Type-C interface, which can replace the traditional display interface.

Q4. What is DSC (Display Stream Compression)?
A4. DSC (Display Stream Compression) is a technology that compresses image data and then transmits it so that high-resolution content can be output with low bandwidth, and that ensures visual distortion-free and low-latency image performance after compression.

Q5. What is HBR?
A5. HBR (High Bit Rate) indicates the ability to display bandwidth.

Q6. Why does it show "slow charging" on my laptop?
A6. Some users may notice that the charging status shows "**slow charging**", this is because some series of laptop have protection protocol, especially laptops that have both Thunderbolt 3 port and over 130W external DC power adapter. Please solve it by using laptop provided external power adapter to charge.
Q7. Why does it show "slow charging" on my laptop?
A7.
