- Quick Start Guide

System Requirements

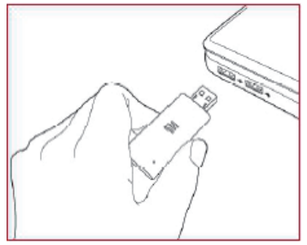
- Laptop or PC with Pentium 1 GHz -compatible or higher processor
- windows 7/8/8.1/10
- Mac os x
- Available highspeed USB port

Driver installation

Windows users

I . Use the driver directly

Connect the AC650 wireless adapter to your laptop/PC.



Note:
If your windows PC/laptop has already installed the driver, then you can just use the wireless adapter once you insert it.

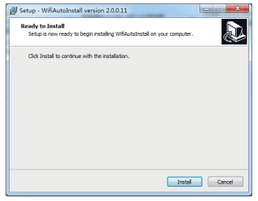
II. Driver installation

1.Click on “**This PC**” icon and choose “**CD-ROM**”. In CD-ROM there are two folders, please select “**Windows**” folder.

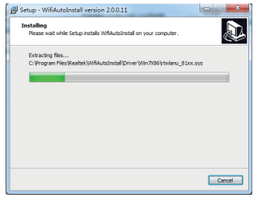
2. Afterwards, click on the “**exe**” file to activate installation.

Note:
If your PC/laptop has not installed the driver. The pop-up folder will prompt you to install the driver once you insert the wireless adapter; dependent on windows configuration, some users cannot receive the popup menu, in this case, you’ll have to open “**This PC**” then find the file in “**CD-ROM**” manually.

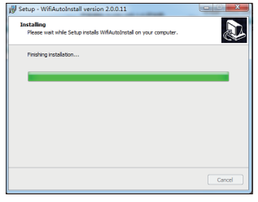
3. When this window appears, click on the "**Install**"button.



4.Then this driver will be automatically installed.



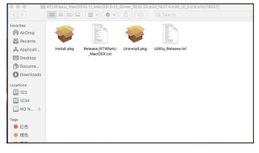
5.The installation process is completed, now you can enjoy your wireless network.



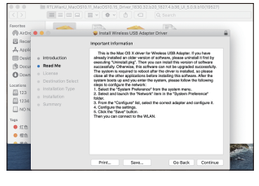
Mac OS users

1.For Mac OS users, please visit WAVLINK website and download the latest driver: **www.wavlink.com**> **SUPPORTS**> **Driver** > **filter by product model**

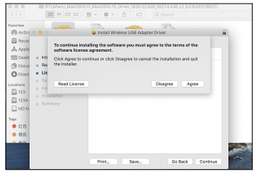
2.Extract the driver file and double-click "**Install.pkg**"file.



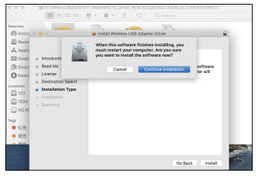
3.Then follow the window instruction and click on the "**continue**" button.



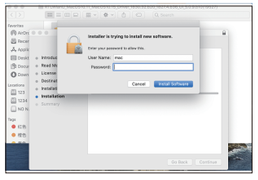
4.Click on the button "**Agree**" to continue the following process.



5.Then the system will prompt you to choose “**continue installation**”.



6.Please input your mac password to permit this process.



7.Then the whole process will end soon after you restart your mac.
