2

Setup

1. Insert the HDD/SSD into the SATA connector and make sure your HDD/SSD is mounted correctly.

2. Plug the adapter in a power outlet, and connect it to the sata adapter.
3. Connect the USB 3.0 cable to your laptop, then the LED light on the adapter will blink.

3

4. After you connect the USB-C cable to the laptop, the new disk window may pop up or you have to find it in "This PC" then you can start using it.
5. Please remember to safely remove the USB adapter on your PC/laptop first then remove manually.

Offline clone

1. Connect the power adapter to the sata adapter and make sure the adapter is not connected to the host.
2. Then connect the source disk to the connector A and connect the target disk to the connector B
3. Press the clone button till all the led get on.
4. Next release clone button. If the 25% led is blinking which means the offline clone is in progress.

When all the led get on, the offline clone should be finished
